The Easter & Spring Collection

You will have 17 different Hand-scooped Easter Chocolates to choose from, as well as a brand-new »Egg-celence from Austria« for Austria fans with a sense of humour.

There are »Sweet Easter Berries« from our new fruit bar range, a »Crunchy Bunny« from the Choco with Nuts range with many hazelnuts, and »Easter Bliss«, a tender-melting almond praline. Also, there's the »Easter Crema«, a fine praline spread.

An intense focus was put on the subject of Easter eggs, and we've created a whole bunch of new products featuring filled Easter eggs, from »Easter Egg Six-Pack« in a bag to small »Easter Eggs in a Box«, which you can position directly at the checkout as an impulse product, there is generally a large selection of myriad Easter egg products. Mostly these are filled with alcohol-free praline mousse, but we also offer enhanced flavours featuring egg liqueur and fruit brandies.

We have optimised the wrappers for our decorated Mi-Xing chocolate eggs, bunnies, hearts etc.: each bar now has a tag depicting its flavour and title, so customers can immediately recognise and grab their product of choice.

All bonbon boxes are filled with all-new bonbon hits, there is an entirely vegan bonbon set with delicious Easter chocolates and 8 different vegan bonbons – completely unique and very much on trend.

To celebrate Mother's and Father's Day, we have many beautiful gift ideas, organic bonbon boxes, brightly decorated hearts, flowers and cars as well as the chocolate classics »For the Most Amazing Mum Ever!« with an almond and rose filling and an intense whisky chocolate, »For the Best Dad in the World!«

For the spring season, we can heartily recommend fruity chocolates from our entire range as well as the new Spring Crema, a fruity praline spread. And our popular Hand-scooped Chocolate Minis in a handy 5-pack are now available all year, in an alcoholic and a non-alcoholic version.

SALES UNIT INSTEAD OF INDIVIDUAL PACKAGING

In order to become more ecological and reduce packaging waste, we will replace individual packaging with small multi-packs with immediate effect.

All products including bonbons, Mi-Xing bars and gift sets are available only in small sales units with 4, 5 or 10 pieces.

Josef and Julia Zotter are delighted about the number of orders. »Our clients and suppliers trust us – that's hugely important for us.«

WHAT A YEAR!

Zotter has achieved excellent results in market testing. First place for innovation, trust and corporate social responsibility. What gives you a boost?

Josef Zotter: This is so amazing and incredible, there is really nothing left to wish for. We really feel that. Despite the global crisis, there has been great demand for our products. The pandemic showed us that values like quality, sustainability and innovation are important to us. When all is well, you don't really notice any of it, but when things go bad, customers go with what they trust.

How have you survived the pandemic?

Josef Zotter: Our values saved us. During the 1st lockdown, we had to reduce work hours for our employees for about 3 weeks, and we also had to close our adventure world, but we quickly managed to restructure. Our scope is quite broad – we're a manufactory, a tourism business and we trade. This kind of set-up has traditionally been quite unpopular – you're supposed to specialise and position yourself and outsource the rest. But we turned to "insourcing" instead of outsourcing, and in the end, this helped us immensely. Our employees have more work than ever, we were able to pay them a bonus and hire 20 new employees on top.

How have your cacao suppliers fared with the pandemic?

Josef Zotter: This has actually been an exciting development. Our cacao cooperatives got in touch immediately during the first lockdown. They were worried about plummeting prices. But there was no price suppression, and the farmers were very relieved. They are realising what fair trade really means, and they now work even harder because they trust us. We've received cacao deliveries that are even better than the ones before. This has always been my vision – a basis of strong trust with our partners and suppliers.

Our focus is on variety, creativity and sustainability

What's next? Prior to the pandemic, you wanted to expand. Is that still on the agenda?

Josef Zotter: Yes, we are re-doing our Bergl shop. Well, we're actually adding a grocery shop and deli, where we will sell our produce from the Edible Zoo. This will be amazing, an entirely new concept for us. We will add a green tunnel to the adventure world, covered in plants. We've got glass panes covered in pixels that produce electricity, and we will install a further photovoltaic system. Our entire business is doing really well in terms of the Green Deal and a climate-neutral economy. I think post-pandemic, climate targets will definitely become a leading issue.

What's your assessment of the role family businesses will have in the world?

Josef Zotter: The very DNA of a family business is a long-term outlook. Family businesses don't speculate, we always think about the next generation. That's why I prefer a circular economy to the rat race. It's not about growth, but about how we can all live well. That's also how I think we'll be able to reach our climate targets.

You achieved first place in Austria in market testing in the area of brand importance, ahead of Schwedenbomben and Mozartkugeln. Has Zotter become a genuine classic?

Josef Zotter: We've always been here, but now we are properly seen. It makes me really happy that apparently a lot of people share our business philosophy and our convictions. But we will not rest on our laurels. We keep at it, and we keep experimenting. For example, with the praline, which can now be found in many of our Easter eggs. We've developed a nut flour which increases the nut content. Nuts contain lots of fat, so technically, you can't just randomly expand nut content. But we've managed it by separating part of the nut amounts, drying them and reintroducing them as nut flour. The result is less sugar and up to 70% nut content.

ART. NO. 16498

The ostriches running around our Edible Zoo produce the giant, dinosaur-like ostrich eggs we use to create our delicious eggnog flowing into a white chocolate ganache enhanced with almond praline. Sublime flavour made even better with genuine vanilla, which comes in at a close second only to saffron in the ranking of the most expensive spices in the world, due to the orchid petals being pollinated by hand. All of this is covered in milk chocolate with a 50% cacao content.

alc.

EGG DANCE

ART. NO. 16292

Egg Liqueur

The white chocolate and almond praline ganache is buzzing with egg liqueur. Nobly refined with real vanilla, which is the second most expensive spice in the world after saffron, because the orchid blossom is pollinated by hand. Wrapped in a milk chocolate with a cacao content of 50%.

100% ORGANIC + FAIR + BEAN-TO-BAR

Our entire business is Fair Trade verified. We are a member of WFTO – the World Fair Trade Organization, which is the umbrella organization for global fair trade. The WFTO monitors business compliance with the 10 principles of fair trade like transparency, respect for the environment, the payment of fair prices and no use of child labour among others. For more on this, go to www.zotter.at/fair-trade and www.wfto.com

100% BEAN-TO-BAR: Zotter chocolates are produced starting from the bean in our bean-to-bar chocolate factory.

All the ingredients for the chocolate come from ORGANIC cultivation. The number of the organic board of control serves as identifying information. ORGANIC control number: AT-BIO-402

THE PROTECTION OF THE ENVIRONMENT

is a very important aspect of our corporate philosophy.

Our environmental protection and our environmental measures are ISO 14001 and EMAS certified. EMAS-certified companies are recorded in a Europe-wide register and are regularly checked and monitored on a national level by environmental experts approved by the environment department. You can find our environmental declaration in German online at www.zotter.at

ORGANIC PLASTIC

If possible, we try to use organic plastic as much as possible: it is derived from renewable materials, is biodegradable and even compostable according to European Standard 13432.

Design

Designed by Andreas H. Grätze

We use certified paper and environmentally friendly colours for the packaging.

ORGANIC SOY LECITHIN

Zotter uses lecithin exclusively from controlled organic cultivation. Organic soy lecithin is guaranteed free from genetic engineering and protects the environment because no rainforests are cleared for its cultivation.

STORAGE ADVICE

We do not use any artificial stabilizers or preservatives. For this reason, our goods are more temperature sensitive than other high-quality chocolate products.

Ideally you should store Zotter chocolates in a cool and dry place where the temperature is between 16 °C and 18 °C.

You should not put the chocolates into a fridge. This way they would lose their substance because the humidity would let the sugar crystallise. If the temperature is too high, though, it will result in the emission of cocoa butter which will settle as a white film on the surface of the chocolate. The loss of the cocoa butter will dry out the chocolate – hence, the flavour of the chocolate will suffer.
