100% BEAN-TO-BAR: Zotter chocolates are produced starting from the bean in our bean-to-bar chocolate factory.

All the ingredients for the chocolate come from ORGANIC cultivation. The number of the organic board of control serves as identifying information. ORGANIC control number: AT-BIO-402

THE PROTECTION OF THE ENVIRONMENT

is a very important aspect of our corporate philosophy.

Our environmental protection and our environmental measures are ISO 14001 and EMAS certified. EMAS-certified companies are recorded in a Europe-wide register and are regularly checked and monitored on a national level by environmental experts approved by the environment department.

You can find our environmental declaration in German online at www.zotter.at

ORGANIC PLASTIC

If possible, we try to use organic plastic as much as possible: it is derived from renewable materials, is biodegradable and even compostable according to European Standard 13432.

DESIGN

Designed by Andreas H. Grätze

We use certified paper and environmentally friendly colours for the packaging.

ORGANIC SOY LECITHIN

Zotter uses lecithin exclusively from controlled organic cultivation. Organic soy lecithin is guaranteed free from genetic engineering and protects the environment because no rainforests are cleared for its cultivation.

STORAGE ADVICE

We do not use any artificial stabilizers or preservatives. For this reason, our goods are more temperature sensitive than other high-quality chocolate products.

Ideally you should store Zotter Chocolates in a cool and dry place where the temperature is between 16 °C and 18 °C.

You should not put the chocolates into a fridge. This way they would lose their substance because the humidity would let the sugar crystallise. If the temperature is too high, though, it will result in the emission of cocoa butter which will settle as a white film on the surface of the chocolate. The loss of the cocoa butter will dry out the chocolate – hence, the flavour of the chocolate will suffer.
